DATE CREATED	1880 – 1930
MATERIAL	Glass; Wood
OBJECT ENTITIES	Bousis, Eleni (owned by) Bousis, Eleni (is related to)
RELATED ITEMS	Coat, 2006.40.1
ACCESS POINTS	glass handmade temperature thermal thermometer weather Wood

OBJECT DESCRIPTION

A glass thermometer encased in a wooden holder. At the top of the thermometer, the wood is in a slender oval shape, acting as a handle for ease of holding. The opening where you see the thermometer is long and oval-shaped, but the wood casing is square. There is a little circle at the bottom of the wood at the base of the thermometer so you can get an accurate reading. There are two oval-shaped holes. A long oval hole, and a small circle hole. These holes are located on both sides of the wood case. The thermometer goes from 0-40.

ORIGIN

Donated by Eleni Bousis. This particular thermometer is a bath thermometer. The thermometer was in Greece and was brought over to New York. This design is similar to the popular Dr. Forbes Specifications model.

CITATION

Thermometer, 1880 – 1930, Eleni's Collection, *National Hellenic Museum*, https://collections.nationalhellenicmuseum.org/Detail/objects/. Accessed 11/10/26.
